Created by Clinicians for Clinicians

SimX is the only VR medical training company founded and operated by practicing clinicians. The wireless, multiplayer, cross-platform software trains healthcare professionals for when virtual becomes reality.

PATENTED MULTIPLAYER

Across the room or world, SimX's patented software allows learners and instructors to train together with cross-platform capability

250+ CASES AND COUNTING

We continuously build and share Simulated Patient Encounters on the SimX Marketplace.

FAST SET-UP

Load and go in JUST five minutes using ANY industry-standard headset.

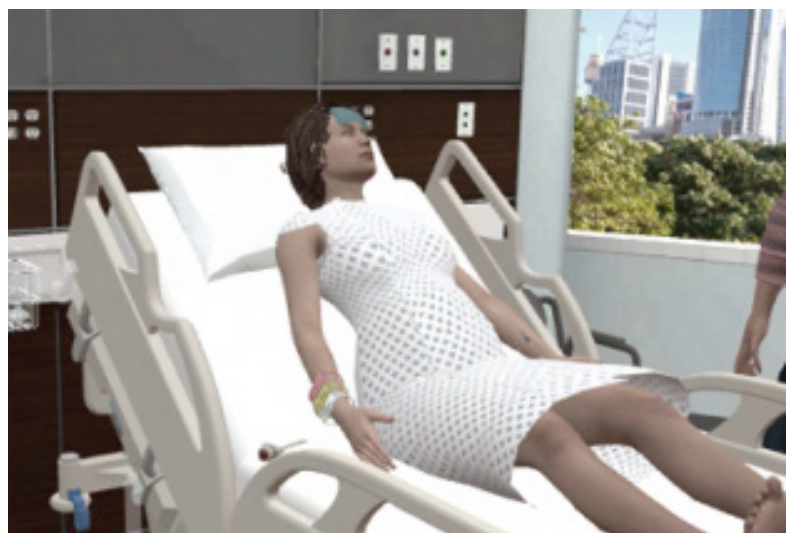

POWERFUL REPORTING

Give and get instant feedback while tracking learners' progress.

IMMERSIVE EXPERIENCE

Practice on virtual patients in a realistic environment - with zero drop-down menus or cue prompts.
